

**VOLUNTARY REMEDIATION PROGRAM
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

PROJECT SUMMARY

Site name:	Former Patton Electric
Applicant Name:	C.A.R.E. LLC
Site location:	15012 Edgerton Road New Haven, Indiana 46774 Allen County
VRP Site No.:	6991203
Project Manager:	Ruth Williams
Date received:	December 13, 1999
Date completed:	November 1, 2001
Project duration:	1 year, 11 months
Contaminant(s):	Volatile organic compounds (VOCs), polynuclear aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), metals
Media cleaned up:	Surface soil, subsurface soil
Cleanup Objectives Achieved:	Tier II Nonresidential (VRP Resource Guide, 1996)
Deed/Land use restrictions:	Nonresidential land use only

Project Description: Prior to 1942, the site was owned by the U.S. Government as part of the military supply depot to the south, and may have been used for "strategic materiel storage." A private individual owned the site 1942-1977, but there is no information on its use. Patton Electric owned the site 1977-1999, manufacturing electric fans, during which time it notified USEPA of hazardous waste operations and was issued RCRA EPA ID# IND 984 879 783. Operations included metal stamping and fabrication, plastic molding, metals parts cleaning, dry-coating, product assembly, and warehousing. The site was purchased by C.A.R.E. LLC in 1999 and was converted to warehouse use. No active remediation was required to achieve the cleanup goals.
